

Meaco DD8L Desiccant Dehumidifier

The Meaco DD8L is a desiccant dehumidifier, this means that it does not have a compressor or cooling coils, making it lighter, quieter and more energy efficient than a traditional dehumidifier.

The use of a desiccant wheel instead of a compressor means that the Meaco DD8L's performance is not affected by temperature and its water extraction rate will remain consistent at all temperatures. This means that at normal room temperatures its performance will be similar to that of a 20 litre compressor dehumidifier, at below 10°C its performance will be similar to a 30 litre dehumidifier.

The fact that it performs so well at cold temperatures, that it warms the air by 10-12°C whilst it dries the air, its continuous drainage facility and that it auto-restarts after a power cut all adds up to why the DD8L is so popular with boat, car, holiday home and caravan owners.

In the home customers rave about its ability to dry loads of washing, the way it warms its surrounding area and the surprising amount of water that it takes out of the air whilst making no more noise than a small fan.

The bonus is that the Meaco DD8L is more than just a dehumidifier, it cleans the air as well. The combination of its ioniser and its anti-bacterial silver nano filter helps to keep the air clean and healthy.

All in all the Meaco DD8L is a very popular dehumidifier that is the correct choice for the majority of domestic applications.

- ✓ 8 litres capacity at all temperatures
- ✓ Perfect for low temperature applications
- ✓ Anti-bacterial silver-nano filter
- ✓ Ioniser to help clean the air
- ✓ Continuous drainage and auto-restart
- ✓ Simple Meaco style control panel
- ✓ Covered tank
- ✓ Just 39 decibels in low mode
- ✓ Warms the air by 10-12°C as it dries

“I never knew there was so much water in my house. It produces a couple of litres every few hours and now I have no condensation at all. It also warms the air and makes the hall feel cosy and welcoming.”

Customer quote taken from the Meaco website

“The DD8L has proved to be very popular with customers and achieves an average rating of over 9/10 on our website. I am not surprised by this because the DD8L is an excellent all rounder and is at home in cold, unattended applications like boats/garages/caravans or holiday homes, as well as the more traditional domestic applications. I know from listening to customers that those who use the DD8L to dry their washing are particularly in love with their machines. I have spent a lot of time over the past five years developing the desiccant dehumidifier technology with the factories and I am delighted that all this hard work has resulted in dehumidifiers that really do make a difference and are appreciated by so many people.”

Chris Michael – Director and Co-Founder of Meaco (U.K.) Limited with over 20 years experience in dehumidification.

Model	Meaco DD8L Desiccant Dehumidifier
For homes up to	4/5 bedrooms
Dehumidifying capacity	8 litres/day (at all temperatures)
Humidistat	Yes, electronic
Electronic controls	Yes
Air Filter	Yes - anti-bacterial silver nano filter
Fan Speeds	Two
Air flow (nominal)	80/100/115 m ³ /h
Continuous drainage option	Yes
Timer	Up to 8 hours
Water container capacity	2 litres
Sound pressure level	39/43/48dBA - every 6dBA is roughly a doubling of noise level
Operating range	1 – 37°C
Power supply	220-240V/50Hz
Power consumption	30/330/650 Watts
Current (nominal)	1.6 A
Compressor type	n/a Desiccant dehumidifier
Refrigerant type / charge	n/a
Automatic defrost	n/a
Dimensions (w x d x h)	351 x 188 x 500mm
Net weight	6.4kg
Gross weight	7.4kg
