

# AG271UG

27

(68.6) LCD MONITOR

The AOC AGON AG271UG is the first 4K model of the AGON series. This 27" gaming monitor offers a 4K IPS panel and NVIDIA G-SYNC. Thanks to the G-SYNC module, gamers can experience the smoothest 4K gameplay.

## G sync

NVIDIA®G-SYNC™ display technology delivers the smoothest and most breathtaking gaming experience on offer. G-SYNC™ synchronizes the monitor's refresh rate to the GPU in your NVIDIA-powered PC, eliminating screen tearing and

minimizing display stutter and input lag. Scenes appear instantly, while objects look sharper and more vibrant.

## Flicker Free

AOC Flicker-Free Technology utilises a DC (Direct Current) backlight panel, reducing flickering light levels. With eye strain and fatigue absolutely minimized, feel free to enjoy those long, intense gaming sessions in comfort!

## IPS Technology

Don't let a lacklustre monitor water down your game: see the image as the developers intended. With rich color production and wide viewing angles, the IPS display panel ensures that you are fully

absorbed into the artist's vision.

## 4K UHD resolution

A 4k/UHD 3840 x 2160 resolution panel with a pixel density of 138 Pixels Per Inch offers 300% more screen space! With 4 times the detail of a normal HD monitor, 4k gamers are thrown into a world of crisp detail and razor sharp imagery that immerses

like never before!

## Lowblue Light

AOC Lowblue Light protects you from harmful blue light which, during long sessions, has been shown

to cause eye strain, headaches, and sleeping disorders. Our Lowblue Light feature reduces the harmful wavelengths emitted without sacrificing color composition, setting the experience free from the worry of eye damage.

Screen Details

Color	Black Red
Resolution	3840x2160 PX
Refresh rate	60Hz
Response time	4
Panel	IPS
Backlight	WLED
flickerfree	✓
Aspect ratio	16:9
Brightness (typical)	300
Contrast (static)	1000:1
Pixel Pitch (H) (V)	0.2331
Diagonal (inch)	27
