## 4K Resolution

A 4k/UHD 3840 x 2160 resolution panel with a pixel density of 163 Pixels Per Inch offers 300% more screen space! With 4 times the detail of a normal HD monitor, 4k gamers are thrown into a world of crisp detail and razor sharp imagery that immerses like never before!

## Wide Colour Gamut

When you are enjoying photos, videos or games, we want your screen content to look as lifelike as possible. That is why this display comes with Wide Colour Gamut technology, which means that it is able to display a lot more colours than conventional monitors. This is achieved through a special hardware solution, not through mere software adjustments. The result: true-to-life images with fine details that become visible thanks to the broader colour palette.

## Flicker Free

AOC Flicker-Free Technology utilises a DC (Direct Current) backlight panel, reducing flickering light levels. With eye strain and fatigue absolutely minimized, feel free to enjoy those long, intense gaming sessions in comfort!

## Display Port

The most recent display interface standard from VESA, DisplayPort can also transfer audio, USB and other forms of data. DisplayPort version 1.2-1.2a support up to 165 Hz@1440p, 75 Hz@2160p, version 1.3 supports up to 240Hz@1440p, 120 Hz@2160p and the version 1.4 supports HDR10 specifications.

Screen Details

Color	Black/Silver
Resolution	3840x2160 PX
Refresh rate	60Hz
