DRILL BIT

PENCIL

Installation

At the back of the mirror, there are 2 hanging hooks spaced across the top. To hang the mirror, two holes are required in the wall. Before drilling, ensure that no wires or pipes are behind the wall. If unsure, seek professional advice.

1. Measure the distance between the centre of the two hanging points.
2. Make a note of the distance and mark their position on the wall. Use a spirit level to ensure that the marks are level.
3. Drill the 2 holes into the wall at the position marked using a suitable drill bit.
4. Insert the wall plugs into the holes.
5. Insert the screws into the wall plugs, ensuring their heads are protruding by approximately 3mm.
6. Check to ensure the screws line up correctly and the mirror can be safely hung from them.
7. Carefully lower the mirror onto the 2 screws, ensuring that it is secure and will not slide.

Cleaning

Wipe the mirror clean and dry regularly, especially when the mirror is subject to steam or splashes.

Do not use harsh chemicals or materials on the product, as this will damage the product and invalidate your guarantee.

To clean and maintain the product, wipe using a clean damp cloth and wipe dry with a soft cloth.
