

User manual

Wi-Fi Temperature & Humidity Sensor

for Indoor/Outdoor use

STHsensor

Thank you for choosing electriQ.

Please read this user manual before using
the WiFi Temperature & Humidity Sensor
and keep it safe for future reference.

Visit our page www.electriQ.co.uk for our
entire range of electricals.

Welcome to electriQ

We hope you're happy with your new purchase.

We'd love to see how you're getting on.

SAFETY INFORMATION

Please read the following safety information carefully before using the device.

This product has been designed and manufactured in accordance with the applicable safety standards, including EN IEC 62311:2020, ensuring that human exposure to electromagnetic fields (EMF) remains within safe limits during normal use

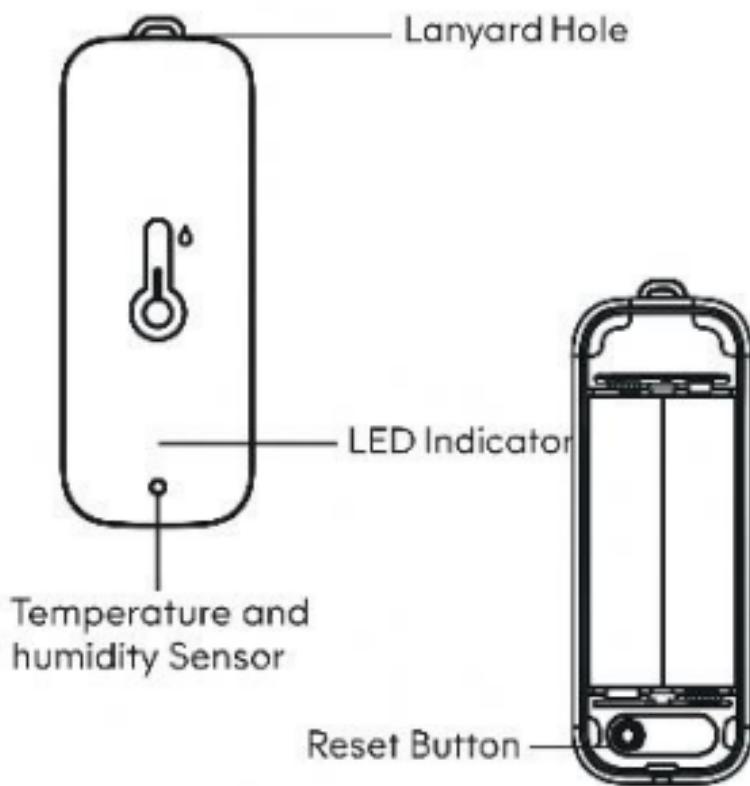

- This device contains a Wi-Fi transmitter operating in the 2.4GHz band (IEEE 802.11 b/g/n) with low output power.
- The product complies with EN IEC 62311:2020 requirements regarding the safe exposure of humans to electromagnetic fields (EMF).

- Always use the device as specified in this manual.
- Keep a minimum distance of at least 20 cm between the device and any person during installation, network configuration, and operation involving active data transmission.
- Avoid prolonged direct contact with the device, especially near the head or body.
- Do not modify or disassemble the device, as this may affect EMF compliance and void the warranty.
- For indoor and sheltered outdoor use only.
- Avoid prolonged exposure to direct sunlight, rain, or extreme weather conditions.
- Install the device securely on a wall, door, or flat surface as described in this manual.

- Keep the device away from heat sources, high humidity, and strong magnetic fields.
- Ensure good Wi-Fi network connectivity to minimise power consumption and maximise performance.
- Only use new alkaline batteries as specified. Do not mix old and new batteries.
- Insert batteries correctly, observing the polarity markings (+/-).
- Remove the batteries if the device will not be used for an extended period to prevent battery leakage and damage.
- Do not expose batteries to excessive heat, fire, or water.
- Dispose of used batteries in accordance with local environmental regulations.
- Clean the device with a soft, dry cloth.

- Do not use solvents, chemicals, or abrasive materials.
- Do not attempt to repair or modify the product yourself.
- This product contains electrical components and should not be disposed of with household waste.
- Dispose of the product and its batteries in accordance with local laws for electronic waste and battery recycling.
- Keep out of reach of children and pets.
- This product is intended for residential and light commercial environments only.
- The device may take up to 30 minutes after network setup to stabilise temperature and humidity readings.
- Ensure correct network configuration immediately after battery installation to avoid unnecessary battery drain.

PRODUCT OVERVIEW

HOW TO USE

Carefully prise off the back cover of the battery compartment. Insert 2 x AAA batteries, ensuring correct alignment of the positive (+) and negative (-) terminals. Confirm that the white indicator light is flashing.

NOTE:

- Always use new alkaline batteries. Do not mix new and used batteries.
- When replacing batteries, please use alkaline batteries. Do not use carbon-zinc batteries.

BEFORE SETTING UP YOUR DEVICE

Ensure the following is checked:

- Your smartphone is connected to a 2.4GHz Wi-Fi network.
- You have entered the correct Wi-Fi password.
- Your smartphone is running Android 6.0 or above, or iOS 11 or above.
- If the number of devices connected to your Wi-Fi router has reached its limit, try disconnecting a device to free up a channel, or use a different Wi-Fi router.

HOW TO SET UP

1. Use your smartphone to scan QR code, or search “Smart Life” app in Google Play Store or APP Store to download and install.

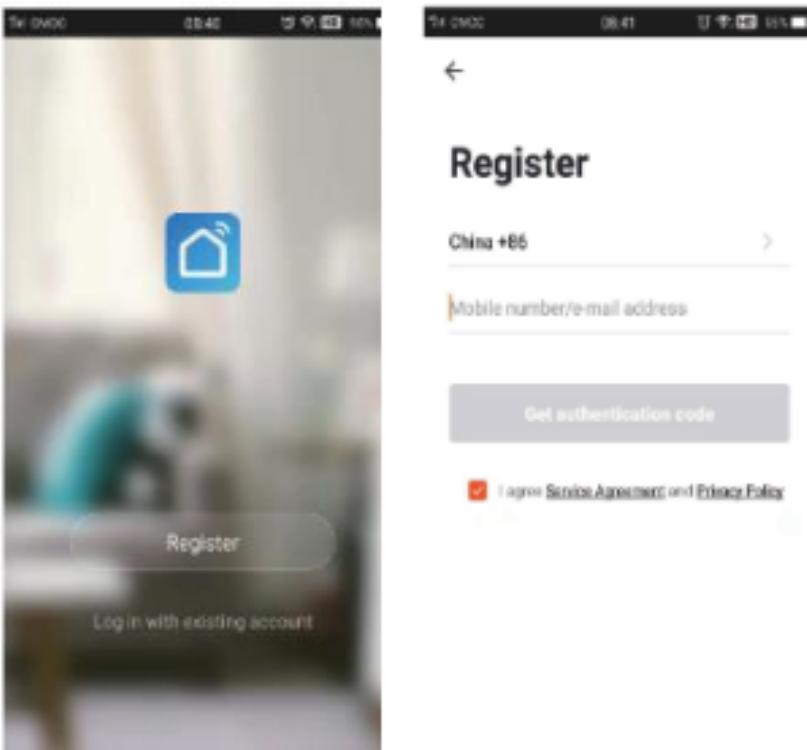

Smart Life

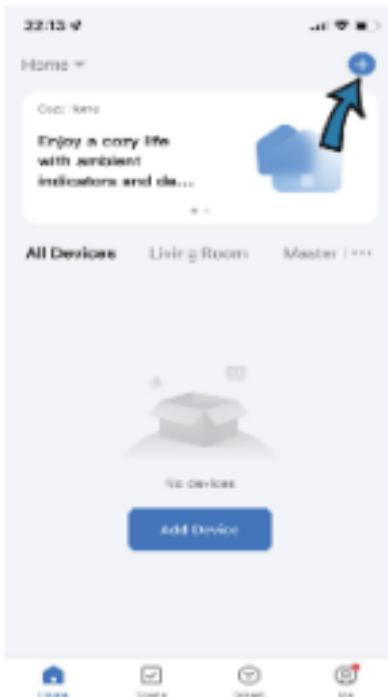

QR Code

2. Create an account with your mobile number and authentication code.

3. Connect your mobile to your Wi-Fi router, click “+” at the upper right corner of homepage or click “Add Device”.

BLUETOOTH MODE:

The app will advise you to turn on the Bluetooth on your mobile, and make sure the indicator is blinking quickly, it will search for the device and add it automatically.

WI-FI MODE:

Select “Temperature and Humidity Sensor (BLE + Wi-Fi)” from “Sensors”.
Select “Blink Quickly”, make sure the LED light is blinking quickly, if not, hold the reset button for about 5 seconds till the indicator is blinking fast.

Wi-Fi Mode

Reset the device

Press and hold the RF/SFT button for 5 seconds until the indicator blinks (subject to the user manual).

Confirm the indicator is blinking

Reset Device Step by Step

Wi-Fi Mode

Reset the device

Press and hold the RF/SFT button for 5 seconds until the indicator blinks (subject to the user manual).

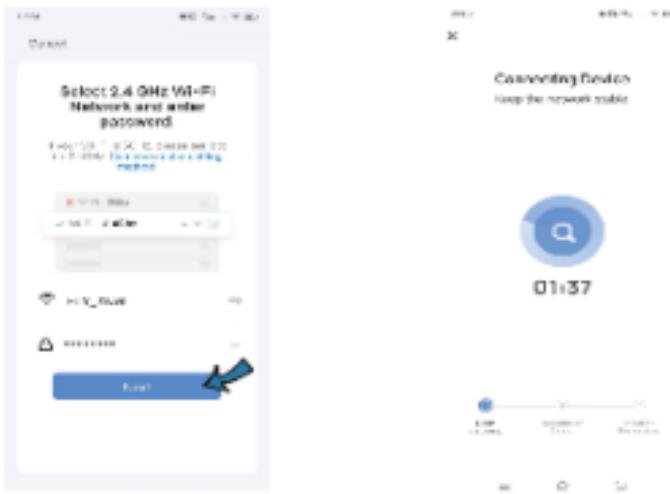

Select the status of the indicator light or hear the beep:

Blink Slowly

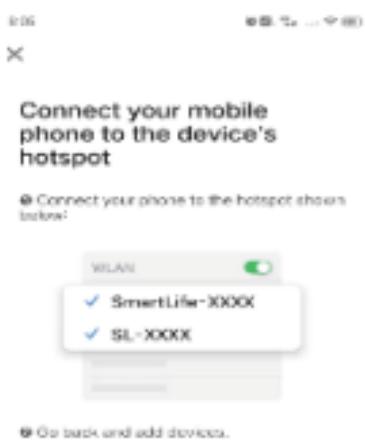

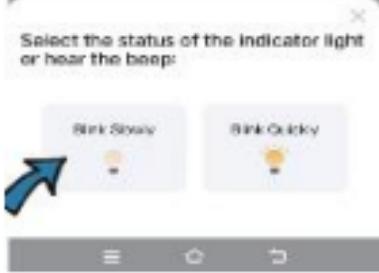

Blink Quickly

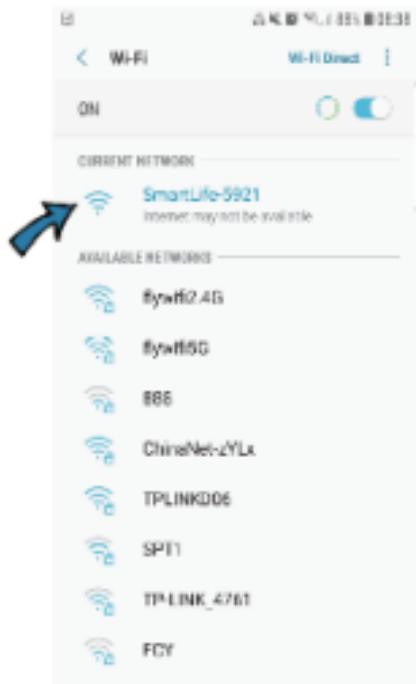

You can also select 'Blink Slowly'. Make sure the LED indicator is blinking slowly. If it is not, press and hold the reset button for about 5 seconds until the indicator starts blinking slowly.

Connect your mobile device to the device's hotspot: "SmartLife-XXXX". Then, return to the app interface. The device will automatically connect to your Wi-Fi router, and the configuration will be completed.

Go back and add devices.

Go to Connect

PLACEMENT

After completing the network configuration, close the back cover. You can then:

1. Use a clean, dry cloth to wipe the area where you wish to mount the sensor. Peel off the adhesive backing and stick it to the back of the sensor. Press firmly to ensure it is securely fixed to the wall.
2. Hang the sensor on a wall or door using the supplied lanyard.
3. Place the sensor on a table or any flat surface, as desired.

FUNCTIONS

1. Temperature & Humidity Alarm

You can preset the desired temperature and humidity range in the settings. When the actual indoor temperature or humidity goes beyond this range, an instant alarm notification will be sent via the app.

2. Temperature & Humidity Calibration

You can calibrate the temperature and humidity in the settings. Select the calibration value, then press the reset button once. The temperature

or humidity reading in the app will update accordingly.

3. Temperature & Humidity Records

You can view historical temperature and humidity data stored for up to one year. Data can also be exported to your email address.

4. Temperature Unit Switch

You can switch the temperature unit between Celsius and Fahrenheit in the settings. Select the preferred unit, then press the reset button once to complete the switch.

5. Intelligent Linkage

You can create smart linkage scenes with other Tuya smart devices, such as a Smart IR Remote Controller.

For example:

When the indoor temperature exceeds 30°C, the air conditioner will turn on automatically.

When the humidity falls below 20%, the humidifier will activate.

6. Third-Party Voice Control

You can check the temperature and humidity using voice assistants such

as Amazon Alexa or Google Assistant.

Example voice commands:

“OK Google, what is the humidity of
<device name>?”

“OK Google, what is the temperature
of <device name>?”

“Alexa, what is the humidity of
<device name>?”

“Alexa, what is the temperature of
<device name>?”

CLEANING AND MAINTENANCE

To ensure the proper operation and longevity of your device, please follow the guidelines below:

CLEANING

- Always disconnect the device from the network (by removing the batteries) before cleaning.
- Clean the outer surface of the device using a soft, dry cloth.
- Do not use water, cleaning sprays, solvents, alcohol, or abrasive cleaning agents, as these may damage the surface or internal components.

- Avoid allowing moisture to enter any openings or seams of the device.

MAINTENANCE

- Check the device periodically to ensure it is securely mounted and operating correctly.
- Keep the device away from heat sources, direct sunlight, and high humidity to avoid affecting the sensor's performance and lifespan
- Ensure the device remains free of dust or debris that could block air circulation around the temperature and humidity sensors.
- Replace the batteries promptly when notified by the app, or if the sensor stops reporting data.

- Use only new alkaline batteries as recommended in this manual.
- If the device is not in use for an extended period, remove the batteries to prevent leakage and potential damage.

IMPORTANT!

Do not attempt to disassemble, repair, or modify the device, as this may result in damage and will void the warranty.

For any issues beyond regular cleaning or battery replacement, please contact customer support

FAQ's

- The device has a waterproof design and can be used outdoors. However, to

maintain its lifespan, avoid prolonged exposure to direct sunlight or rain.

- Please complete the network configuration immediately after installing the batteries to prevent unnecessary power consumption. Also, ensure your Wi-Fi network is stable—if the connection is poor, the device will repeatedly attempt to connect, causing the batteries to drain quickly.
- Around 30 minutes after completing the Wi-Fi setup, the temperature and humidity readings will stabilise and more closely reflect the actual environment. For more accurate results, keep the sensor away from heat sources.
- As this is a low-power device, if no data is reported within 24 hours, the app will notify you that the device is offline.
- When the ambient temperature changes by at least 0.5°C or the humidity changes

by at least 5%, the temperature and humidity readings will update every 2 minutes.

- If the ambient temperature changes by less than 0.5°C or the humidity changes by less than 5%, the readings will update once every hour.

TECHNICAL SPECIFICATION

Dimensions	73*25*20mm
Battery	LR03-1.5V/AAA*2 (Alkaline battery)
Wi-Fi Standard	2.4GHz only not compatible with 5GHz networks
Temperature Measure Range	-20 °C~ 60°C
Temperature Accuracy	+/-1°C
Humidity Measure Range	0% RH~100% RH
Humidity Accuracy	-+5% RH

PSTI STATEMENT OF COMPLIANCE

Description: WiFi Temperature & Humidity Sensor.

Model Number: STHsensor

Manufacturer: ElectriQ, 2A Trident Business Park, Leeds Road, Huddersfield, HD2 1UA

PSTI Contact:

TiSecurity@buyitdirect.co.uk

We have prepared this statement of compliance and can confirm that this product is compliant with the deemed compliance conditions in Schedule 2 of The Product Security and Telecommunications Infrastructure (Security Requirements for Relevant Connectable Products) Regulations 2023.

Duration of security updates: 30/12/2029.
This date is correct at the time of printing,
but we may extend it. Please visit
www.electriQ.co.uk for the latest
information and details of our PSTI
compliance.
